

Dear Dr Skinner,

Thank you for submitting a revised manuscript.

I think for consistency and clarity, it would be useful to show the response rate e.g. 66% (20/30 responses) throughout the paper rather than just within some of the sections as it is quite difficult without to follow how many responses there were for any given question. As such lines 503-505, 531-535 and 540-542 would benefit from this addition.

Beyond this minor revision, I would be happy to accept this manuscript for publication.

Thank you for submitting to Geoscience Communication and wishing you all the best for the festive season.

Kind regards,
Katharine

Dear Katherine

Thank you for the comments. Please see the revised manuscript, I have included the number of responses as requested at all relevant points.

Thank you for the additional time for these minor revisions over the festive season, it is appreciated!

Many Thanks
Chris
