Thank you for providing links to the several interesting articles related to the Gaia hypothesis. They certainly discuss this topic in a more balanced manner, acknowledging some of the controversy and criticisms. My point was simply that the submitted manuscript does not reflect the same level of balance as these articles referenced. Therefore, I do hope you can assist the corresponding author with revisions to bring it in line with other literature as to how the Gaia hypothesis, and other scientific topics discussed, are presented. I am glad to hear that the issues of a clear objective and narrative flow are being seriously considered.
