Response to reviews of gc-2021-15 manuscript:

Review 1: We made all of the changes requested by Dr. White as suggested.

Review 2: We have included references suggested by the reviewer and a few more that discuss geologic applications of photogrammetry and recommended data collection methods. We made minor changes to the discussion of data collection and education to explain the lack of rigor in our methods. We added a statement about why we are recommending 3-D pdfs over the use of websites for this project. We also corrected and added references and links to figures as needed.

Mark-up copy

Line 8, 39, 71, 255: we redefined education levels as requested by the editor

Line 74-76: inserted a brief statement of our intent for clarification

Line 103, 136-137, 180, 216; 238, 243, 244, 245, 286-287: minor rewording

Line 142-148, 227-236: address data collection issues

Line 155-161: add discussion of the choice to emphasize 3-D pdfs

Line 211-213, 260-265: added additional education material or discussion
