Comments to Author (Post-Review) Point-by-Point Responses

Thank you to the Editor for all their constructive feedback.

We have included the proposed changes with regards to active/passive language and also attempted to replicate this throughout the manuscript.

All individual comments provided by the Editor (post-review) have been addressed, including typos, deleting words, and tightening of identified sentences. Due to the number of suggested edits, we have not listed them all in this response.

Because of the removal of some sentences, some references are no longer mentioned in the text. They have therefore been removed from the Reference List and any new references have been added.

This version of the manuscript does include additional edits that were suggested and addressed by the two reviewers. This includes the extra figures and cross-referencing between them and the maps in Figure 1, and the addition of a summary table (Table 1) at the end.
